ArcGIS 9 Uninstall Utility

This utility will assist you in locating and removing previously installed and conflicting ArcGIS products, in preparation for the installation of ArcGIS 9.3.

Description:

This utility will locate and automatically remove ArcGIS 9.x products that are installed on your machine. Uninstalling these products is required to install ArcGIS 9.3.

System Requirements:

Platform: PC-Intel

ArcGIS Software: ArcGIS 9.0, 9.1, or 9.2 products (excluding Beta releases)

How to use the Uninstall Utility

Launch the utility by running 93ConflictDetector.exe

Conflicting products will be displayed.

Click uninstall to remove all products displayed.

After the conflicting products have been removed, click exit to dismiss the utility.

ArcGIS 9.3 products can now be installed.

Logs of the uninstall process for each product can be found at C:\documents and settings\My Documents folder.

Known Issues

- The uninstall utility will not locate and remove third party extensions or plug-ins. You should manually uninstall these products (using the Operating System Add/Remove) before removing your ArcGIS products.
- Beta releases are not detected.
- Product versions prior to 9.X are not detected.
- 93ConflictDetector.exe and 93ConflictDetector.txt must exist in the same location for the utility to function properly.
- The contents of 93ConflictDetector.txt should not be changed.
