Academic Agreement to use ABAQUS

The OSC has a license for ABAQUS (hereinafter called Licensed Program) that allows for academic use. The Master Customer License and Online Services Agreement is by and between the Ohio Supercomputer Center (OSC), and Dassault Systemes Americas Corp. (hereinafter "DS"). OSC's agreement with DS requires each individual granted academic access to share the responsibilities governing usage of the Licensed Program. This form is how OSC collects the information needed to monitor access and ensure that all users have seen and agree to the terms of use.

Academic Use means any use of the DS Offerings by authorized users solely for education, institutional, instruction, and/or research purposes. Academic Use can be granted only to users at an organization that is an institution of education and/or research and that grants academic degrees (diploma or certificate) at any primary, secondary or higher education level.

License and Use Rights. Academic Use licenses shall not be used, directly or indirectly, for any commercial purpose. OSC is authorized to allow the following academic institutions ("Authorized Institutions") to use the Licensed Program only on hardware located at OSC's premises and only during the then current term of the Licensed Program:

- o University of Cincinnati
- o Miami University of Ohio
- o The Ohio State University
- o University of Toledo
- o Wright State University

Additional Authorized Institutions may be added to this Agreement during the then current term of the Licensed Programs, according to the agreement's stipulations established between OSC and DS. No Authorized Institution may be removed from this Agreement during the term of the Licensed Program.

The undersigned user will not use academic access as a means of direct monetary gain nor will the user use academic access in such a way as to cause direct monetary loss to any private business or public concern.

Academic access is permissible if the funding is earmarked for academic institutions and the programs, and results arising from the research will be made freely available to anyone and without unreasonable delay.

If you publish the results of the research for which you seek academic access, this publication will be made widely available, and OSC and the use of the Licensed Program will be acknowledged.

You will not attempt to copy or distribute the source, object, or executable versions of the Licensed Program.

Primary Investigators are responsible to have any user accessing their OSC project to use the Licensed Program, including themselves, students, coworkers or others, to read and sign a copy of this form.
