Ohio Supercomputer Center announces \$4 million addition to flagship system

onCampus

Newsbriefs, 3/5/09

The Ohio Supercomputer Center is expanding its flagship supercomputing system with a \$4 million addition, which will more than double the center's current computing power and memory, significantly increase computational capacity dedicated to Ohio's bioscience and research efforts and further increase the state's competitive advantage. Located on West Campus, OSC provides Ohio industries and universities, including Ohio State, with a reliable high-performance computing and networking infrastructure.
