

Questions for early users.

1. What software package(s) did you run on Pitzer during the Early User program?
2. Did you (select all that apply)
 - a. Install and build software for your own use (including for others in your research group)
 - b. Use OSC installed packages
 - c. Use a binary or container from another source
3. If you selected 2.a., did you have any problem with the build/install on Pitzer? If yes, please explain.
4. Did you have any issues with getting your jobs to run to completion on Pitzer? If yes, please explain.
5. Did you encounter any issues with numerical stability or differing numerical results on Pitzer vs. another OSC cluster? If yes, please explain.
6. Did you have any concerns with the performance (run-times) that you saw on Pitzer vs. another OSC cluster? If yes, please explain.
7. What Pitzer resources did you use (select all that apply)
 - a. Standard Compute nodes
 - b. GPU nodes
 - c. Large Memory nodes
 - d. IME
 - e. OSC OnDemand
8. Did specialized resources (GPU, Large Mem, IME) provide a performance advantage vs. standard resources? If yes, please explain.
9. Did you have the support from OSC staff needed to make effective use of the Pitzer Early User program? Please explain.
10. Are there items related to getting your work running on Pitzer that you would like further help with? If yes, please explain.
