What is the Ohio Supercomputer Center?

www.osc.edu

OH·TECH | Ohio Technology Consortium
A Division of the Ohio Board of Regents

The OH-TECH Consortium

Ohio Supercomputer Center provides high performance computing, software, storage and support services for Ohio's scientists, faculty, students, businesses and their research partners.

OARnet connects Ohio's universities, colleges, K-12, health care and state and local governments to its high-speed fiber optic network backbone. OARnet services include co-location, support desk, federated identity and virtualization.

OhioLINK serves nearly 600,000 higher education students and faculty by providing a statewide system for sharing **50 million books and library materials**, while aggregating costs among its 90 member institutions.

eStudent Services provides students increased access to higher education through e-learning and technology-enhanced educational opportunities, including virtual tutoring.

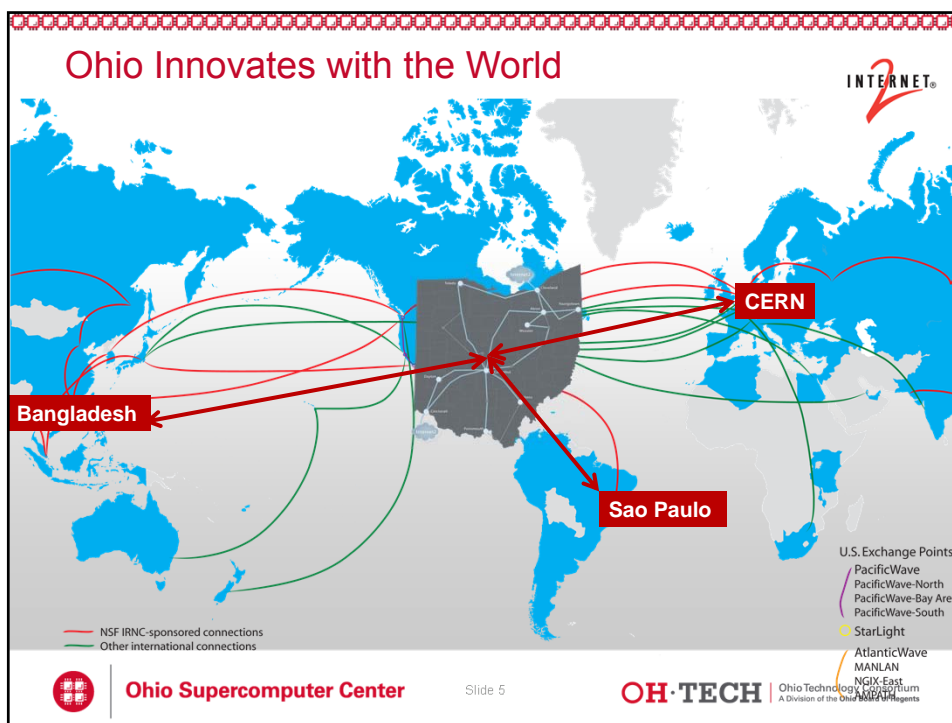

Research & Innovation Center will operate, when opened, as the proving grounds for next-generation technology infrastructure innovations and a catalyst for cutting-edge research and collaboration.

Ohio Supercomputer Center

Slide 4

A Division of the Ohio Board of Regents

About OSC

- Founded in 1987
- Statewide resource for all universities in Ohio
 - high performance computing services
 - computational science expertise
 - “... propel Ohio's research universities and private industry to the forefront of computational based research.”
- Funded through the Ohio Department of Higher Education
- Reports to the Chancellor
- Located on OSU's west campus
- Fiscal agent is OSU

Research Impact FY2014

- Production Capacity
 - **82+ million CPU core-hours** delivered
 - Over **3.3 million jobs**
 - **835 TB data storage** space in use
 - **98% uptime** (target: 96% cumulative uptime)
- Client Service Facts
 - **24 universities** served around the state
 - **194 projects** received allocations
 - **948 individuals** ran a computing simulation or analysis
 - **330+ individuals** attended **18 training opportunities**

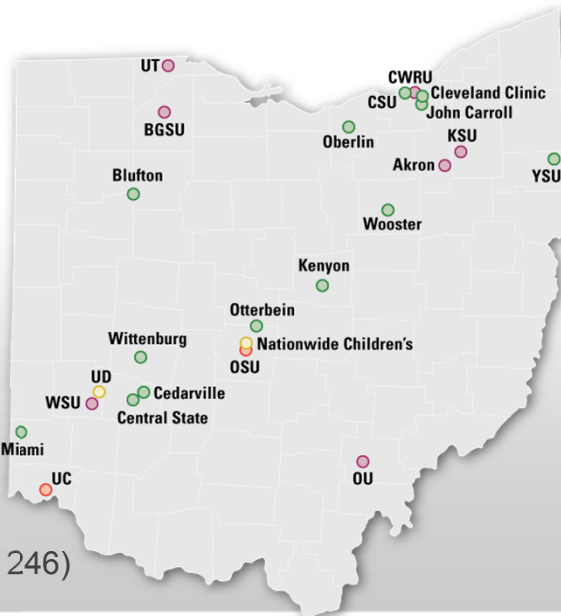

Ohio Supercomputer Center

Computing Resource Usage by Field of Science (FoS)

Ohio Supercomputer Center

Slide 9

Ohio Technology Consortium
A Division of the Ohio Board of Regents

HPC Client Services

- Technical Assistance
 - Help desk and basic consulting
 - Contact by phone or email (oschelp@osc.edu)
- Facilitation
 - Meet with OSC staff to discuss your research needs
 - Get recommendations on services, connections to subject matter experts, and specialized projects initiated
- Project Administration
 - Manage allocations
 - Add/Remove authorized users
 - Utilization reports
- Training
 - Usually three workshops per semester on a variety of topics
- Advanced consulting
 - Code parallelization & optimization
 - Software development, algorithm research
- Website
 - www.osc.edu/supercomputing

Ohio Supercomputer Center

Slide 10

Ohio Technology Consortium
A Division of the Ohio Board of Regents

What can OSC provide you?

- You can complete your research for less cost.
- You can do more science for the same cost.
- You can get to solution faster.

Ohio Supercomputer Center

Slide 11

Ohio Technology Consortium
A Division of the Ohio Board of Regents

What can OSC provide you?

- “Capability computing” (High Performance Computing)
 - Computation too large to run on laptop/desktop
- “Capacity computing” (High Throughput Computing)
 - Takes too long on laptop, need to make many runs
- Data Analytics
 - Massive memory requirements
- Access to licensed software
 - Have academic licenses for many commercial packages
- Expertise, collaboration
 - Parallel computing, algorithms, web portals, etc.

Ohio Supercomputer Center

Slide 12

Ohio Technology Consortium
A Division of the Ohio Board of Regents

Statewide Licensed Software

- Use the software in your lab or office
 - Connect to license server at OSC
- Software available
 - Altair Hyperworks
 - Totalview Debugger
 - Intel Compilers, Tools, Libraries
 - Portland Group Compilers
- Contact OSC Help
 - Provide your IP address

Big Numbers

Prefix

- K
 - kilo, 10^3 , thousand
- M
 - mega, 10^6 , million
- G
 - giga, 10^9 , million
- T
 - tera, 10^{12} , trillion
- P
 - peta, 10^{15} , quadrillion
- E
 - exa, 10^{18} , quintillion

Example: bytes

- 1KB – very small
- 12MB L2 cache per core
- 48GB memory per node
- .5 TB disk space per user
- 4 PB aggregate storage
- Exascale systems – current research area

Ohio Supercomputer Center

Slide 15

Ohio Technology Consortium
A Division of the Ohio Board of Regents

HPC Terminology

- Cluster
 - A group of computers (nodes) connected by a high-speed network, forming a supercomputer
- Node
 - Equivalent to a high-end workstation, part of a cluster
- Core
 - A processor (CPU), multiple cores per processor chip
- FLOPS
 - “FLoating-point Operations (calculations) Per Second”

Ohio Supercomputer Center

Slide 16

Hardware Overview

www.osc.edu

OH·TECH | Ohio Technology Consortium
A Division of the Ohio Board of Regents

Supercomputers at OSC

- Ruby cluster (small cluster, limited access)
 - Online March 2015
 - Named for Ruby Dee, actress, poet, playwright, screenwriter, journalist and activist. She was born in Cleveland.
 - HP system, Intel Xeon processors, 4800 cores
- Oakley cluster
 - Online March 2012
 - Named for Annie Oakley, famous Ohio sharpshooter
 - HP system, Intel Xeon processors, 8280 cores
- Glenn cluster
 - “Glenn phase II” online July 2009
 - Named for John Glenn, Ohio astronaut and senator
 - IBM 1350, AMD Opteron processors, 3500 cores

Ohio Supercomputer Center

Login Nodes – Configuration

- Oakley
 - 2 general-purpose login nodes
 - 12 cores, 124 GB memory each
 - Connect to oakley.osc.edu
- Ruby
 - 2 general-purpose login nodes
 - 20 cores, 132 GB memory each
 - Connect to ruby.osc.edu
- Glenn
 - 2 general-purpose login nodes
 - 16 cores, 64 GB memory each
 - Connect to glenn.osc.edu

Ohio Supercomputer Center

Slide 21

OH·TECH | Ohio Technology Consortium
A Division of the Ohio Board of Regents

Login Nodes – Usage

- Purpose
 - Submit jobs to batch system
 - Edit files
 - Manage your files
 - Interactive work – small scale
- Limits
 - 20 minutes CPU time
 - 1GB memory
- Use the batch system for serious computing!

Ohio Supercomputer Center

Slide 22

OH·TECH | Ohio Technology Consortium
A Division of the Ohio Board of Regents

Compute Nodes – Oakley

- 684 standard nodes
 - 12 cores per node
 - 48 GB memory (4GB/core)
 - 812 GB local disk space
- 8 large memory nodes
 - 12 cores per node
 - 192 GB memory (16GB/core)
 - 812 GB local disk space
- Network
 - Nodes connected by 40Gbit/sec Infiniband network (QDR)

Ohio Supercomputer Center

Slide 23

Ohio Technology Consortium
A Division of the Ohio Board of Regents

Special Resources – Oakley

- GPU computing
 - 128 NVIDIA Tesla M2070 GPUs
 - 64 of the standard nodes have 2 GPUs each
- 1 huge memory node
 - 32 cores
 - 1 TB memory

Ohio Supercomputer Center

Slide 24

Ohio Technology Consortium
A Division of the Ohio Board of Regents

Compute Nodes – Ruby

- 240 standard nodes
 - 20 cores per node
 - 64 GB memory (3.2GB/core)
 - 1 TB local disk space
- Network
 - FDR Infiniband interconnect

Ohio Supercomputer Center

Slide 25

Ohio Technology Consortium
A Division of the Ohio Board of Regents

Special Resources – Ruby

- GPU computing
 - 20 NVIDIA Tesla K40 GPUs
- Intel Xeon Phi accelerators
 - 20 Intel Xeon Phi 5110p coprocessors
- 1 huge memory node
 - 32 cores
 - 1 TB memory

Ohio Supercomputer Center

Slide 26

Ohio Technology Consortium
A Division of the Ohio Board of Regents

Compute Nodes – Glenn

- 436 compute nodes
 - 8 cores per node
 - 24 GB memory (3GB/core)
 - 393 GB local disk space
- Network
 - Nodes connected by 20Gbit/sec Infiniband network (DDR)

Ohio Supercomputer Center

Slide 27

Ohio Technology Consortium
A Division of the Ohio Board of Regents

Special Resources – Glenn

- GPU computing
 - 18 NVIDIA Quadro Plex S4 systems
 - Each Quadro Plex S4 has 4 Quadro FX GPUs
 - 36 of the standard nodes have 2 GPUs each

Ohio Supercomputer Center

Slide 28

Ohio Technology Consortium
A Division of the Ohio Board of Regents

Hardware Performance – Oakley

- CPU performance
 - 88 trillion floating point operations per second (TFLOPS) peak performance
 - 79 TFLOPS sustained performance
- GPU acceleration
 - 66 TFLOPS peak performance
- Total peak performance
 - 154 TFLOPS

Ohio Supercomputer Center

OSC File Space Information

- Lustre – Parallel File System (Temporary Space)
 - ~570 TBs (all disk)
- GPFS
 - ~1.1PB total usable (Disk)
 - Hierarchical storage capable to tape subsystem
 - Allocated to projects in TBs, for limited time periods
- Home Directory Space / NFS
 - ~295 TBs usable (Disk)
 - Allocated to each user, 500 GB quota limit

Mass Storage Overview

- 2 Petabytes (PBs) of usable disk
- 1100 TBs GPFS storage
- 570 TBs Lustre storage
- 1.8 PBs tape

Resource Grants and Accounts at OSC

www.osc.edu

Ohio Technology Consortium
A Division of the Ohio Board of Regents

Who can get an account?

- Academic accounts
 - Principal investigator (PI) must be a full-time faculty member or research scientist at an Ohio academic institution
 - PI may authorize accounts for students, post-docs, collaborators, etc.
 - Classroom accounts are also available
 - No cost to Ohio academic users
- Commercial accounts
 - Commercial organizations may purchase time on OSC systems

Ohio Supercomputer Center

Slide 33

OH·TECH | Ohio Technology Consortium
A Division of the Ohio Board of Regents

Accounts and Projects at OSC

- Project
 - Headed by a PI
 - May include other users
 - Basis for accounting at OSC
 - Submit proposal for computing resources for a project
- Account
 - Username and password to access HPC systems
 - Each account associated with one project
 - Each account used by one person (please!)
 - If you work on multiple projects, you will have multiple accounts.

Ohio Supercomputer Center

Slide 34

OH·TECH | Ohio Technology Consortium
A Division of the Ohio Board of Regents

Allocations and Charges

- Charges are in terms of resource units
- Resource units
 - 1 resource unit (RU) = 10 CPU hours
 - CPU hour = walltime x (total # of cores requested)
- Project receives an allocation of RUs
- Jobs are charged to a project

Ohio Supercomputer Center

Slide 35

Ohio Technology Consortium
A Division of the Ohio Board of Regents

Getting an Account

- Startup grant
 - One per PI per lifetime
 - Provide contact info, institution, department
 - 5000 RUs
- Additional allocations for a project
 - Submit a proposal for more RUs
 - Standard: 10,000
 - Major: 30,000
 - Discovery: >30,000
 - Peer-reviewed
 - Grants awarded by Statewide Users Group (SUG)

Ohio Supercomputer Center

Slide 36

Ohio Technology Consortium
A Division of the Ohio Board of Regents

Citing OSC

- Please cite OSC in your publications:
 - Details at www.osc.edu/citation
- These publications should be reported to OSC

Ohio Supercomputer Center

Slide 37

Ohio Technology Consortium
A Division of the Ohio Board of Regents

ARMSTRONG Researcher Portal

- <https://armstrong.osc.edu>
- Manage your project and accounts
 - Monitor resource utilization on all your projects
 - Add authorized users (request accounts) – PIs only
- View current information
 - OSC system notices
 - Research opportunities
- Post publications

Ohio Supercomputer Center

Slide 38

Ohio Technology Consortium
A Division of the Ohio Board of Regents

ARMSTRONG Research Portal

<https://armstrong.osc.edu>

MyOSC

- Site for managing your identity at OSC
- Update your email
- Change your password
- Recover access to your account
- Change your shell
- And a lot more in the future
 - Project reporting
 - Authorized user management
 - Requesting services (e.g. software access)

Ohio Supercomputer Center

Slide 40

OH-TECH | Ohio Technology Consortium
A Division of the Ohio Board of Regents

Your Contact Info

- Keep your contact information current
 - Use my.osc.edu to manage your account details.
- If your student continues to use OSC after graduation, make sure email address is updated
 - Acceptable if still collaborating with you
- May need to contact you about problems
- Will need to contact you about regular password changes
- You can opt out of routine notifications

Ohio Supercomputer Center

Slide 41

OH·TECH

Ohio Technology Consortium
A Division of the Ohio Board of Regents

Statewide Users Group (SUG)

- The Statewide Users Group (SUG) is made up of OSC users
 - Provides program and policy advice to OSC
 - Meets twice a year
 - Headed by a chairperson elected yearly
- Standing committees
 - Allocations
 - Software and Activities
 - Hardware and Operations
- Get involved!
 - Next meeting is December 3rd in Columbus

Ohio Supercomputer Center

Slide 42

OH·TECH

Ohio Technology Consortium
A Division of the Ohio Board of Regents

System Status

- Check system status on:
 - <https://www.osc.edu/supercomputing> (bottom of page)
 - <https://armstrong.osc.edu/systemnotices/index.php>
 - Message of the day (/etc/motd) – displayed at login
 - Twitter: @HPCnotices
 - Email for major outages or problems
- Scheduled downtimes
 - Quarterly maintenance – one day outage
 - Jobs held for up to two weeks prior

Ohio Supercomputer Center

Slide 43

Ohio Technology Consortium

User Environment

www.osc.edu

Ohio Technology Consortium
A Division of the Ohio Board of Regents

Linux Operating System

- “UNIX-like”
- Widely used in HPC
- Mostly command-line
- Choice of shells (bash is default)
- Freely distributable, open-source software
- Tutorials available
- www.linux.org

Ohio Supercomputer Center

Slide 47

Ohio Technology Consortium
A Division of the Ohio Board of Regents

Connecting to the Oakley, Ruby, or Glenn Cluster

- Connect to OSC machines using **ssh** (secure shell)
 - From a Linux/UNIX machine : At prompt, enter

```
ssh userid@oakley.osc.edu
```

```
ssh userid@ruby.osc.edu
```

```
ssh userid@glenn.osc.edu
```
 - From a Mac: Enter **ssh** command in TERMINAL window
 - From Windows: **ssh** client software needed
 - Both commercial and free versions are available
- New: Connect using OnDemand portal (web-based)

Ohio Supercomputer Center

Slide 48

Ohio Technology Consortium
A Division of the Ohio Board of Regents

OSC OnDemand

- 1: User Interface
 - Web based
 - Usable from computers, tablets, smartphones
 - Zero installation
 - Single point of entry
 - User needs three things
 - ondemand.osc.edu
 - OSC Username
 - OSC Password
 - Connected to all resources at OSC
- 2: Interactive Services
 - File Access
 - Job Management
 - Visualization Apps
 - Desktop access
 - Single-click apps (Abaqus, Ansys, Comsol, Paraview)
 - Terminal Access

Ohio Supercomputer Center

Slide 49

OH·TECH | Ohio Technology Consortium
 A Division of the Ohio Board of Regents

Connecting to an OSC Cluster with Graphics

- Programs on the cluster can have an X-based GUI
 - Display graphics on your computer
- Linux/UNIX and Mac: Use **-x** flag

```
ssh -X userid@oakley.osc.edu
```
- Windows: Need extra software
 - Both commercial and free versions are available
 - Configure your ssh client to tunnel or forward X11
- Primarily used with programs on login node
 - Can also use with interactive batch jobs

Ohio Supercomputer Center

Slide 50

OH·TECH | Ohio Technology Consortium
 A Division of the Ohio Board of Regents

Transferring Files to and from the Cluster

- Most file transfers to and from OSC machines use **sftp** or **scp**
 - Linux and Mac have them built in
 - Windows needs extra software
- For small files, connect to login node
oakley.osc.edu
glenn.osc.edu
- For large files, transfer may fail due to shell limits
 - Connect to **gridftp01.osc.edu** (file transfer only)

Ohio Supercomputer Center

Slide 51

OH·TECH

Ohio Technology Consortium
A Division of the Ohio Board of Regents

File Transfer & Editing

Common Catalog

Visualization

OSC OnDemand
where you go to do everything at OSC
OnDemand provides an integrated, single access point for all of your resources on Glenn and Oakley.

Job Submission & Monitoring

Command Line

Ohio Supercomputer Center

OH·TECH | Ohio Technology Consortium
A Division of the Ohio Board of Regents

Slide 52

Text editing

- Traditional Unix editors
 - `vi`
 - `emacs`
 - Many books and web pages about `vi` and `emacs`
- GUI editor
 - `gedit`
- Simple editor
 - `nano`
- Can also edit on your computer and transfer files back and forth
 - `dos2unix`, `unix2dos`, `mac2unix`

Ohio Supercomputer Center

Slide 53

Ohio Technology Consortium
A Division of the Ohio Board of Regents

Demo

- OSC OnDemand
- ssh
- sftp
- Linux
- Home directory tree
- Text editor: nano

Ohio Supercomputer Center

Slide 54

Ohio Technology Consortium
A Division of the Ohio Board of Regents

Modules

- Add or remove software from your environment, e.g.,
 - `module load comsol`
- Allow multiple versions of software to coexist on our system
- Allow us to make changes without affecting you
 - PLEASE DON'T HARDCODE PATHS!
- Can load modules at command prompt or in your `.bash_profile` or `.bashrc` file
- Also load modules in your job (batch) scripts

Ohio Supercomputer Center

Slide 55

Ohio Technology Consortium
A Division of the Ohio Board of Regents

Modules and your shell environment

- How modules work
 - Modify environment variables like `$PATH` and `$MANPATH` within your shell
- Default set of modules loaded at login
 - module system, batch system (do not unload)
 - default compiler and MPI modules
- Do NOT completely replace `$PATH` in your `.bash_profile` or `.bashrc`
- DO prepend directories to the existing `$PATH`
 - Type: `export PATH=$HOME/bin:$PATH`

Ohio Supercomputer Center

Slide 56

Ohio Technology Consortium
A Division of the Ohio Board of Regents

Module Commands (Oak/Glenn not the same!)

- What modules do you have loaded?
 - `module list`
- What modules are available?
 - `module spider` or `module avail`
- Multiple versions of the same software
 - `module avail intel`
- Add a software module to your environment
 - `module load cuda`
- Remove a software package from your environment
 - `module unload intel`
- Load a different software version
 - `module swap intel intel/13.1.3.192`

Ohio Supercomputer Center

Slide 57

Ohio Technology Consortium

An OH-TECH Consortium Member

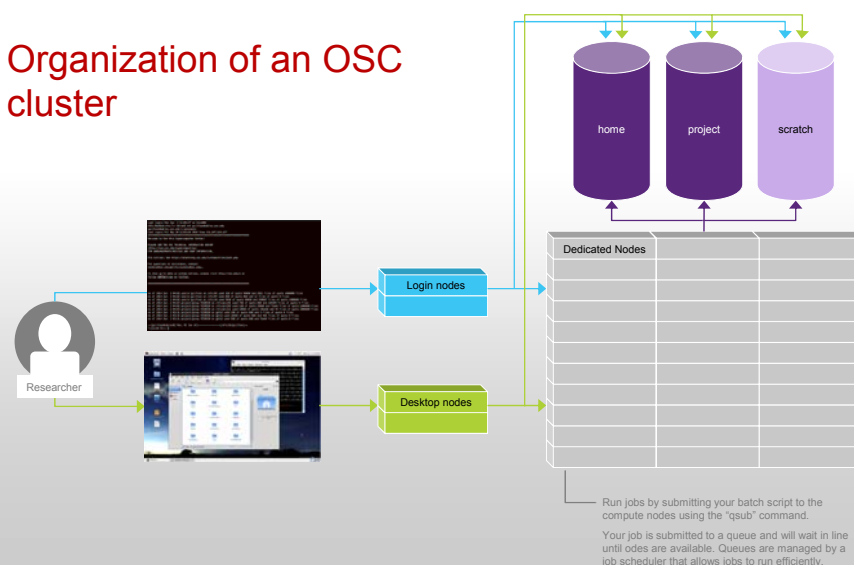

Batch Processing

www.osc.edu

Ohio Technology Consortium
A Division of the Ohio Board of Regents

Organization of an OSC cluster

Ohio Supercomputer Center

Slide 59

Ohio Technology Consortium
A Division of the Ohio Board of Regents

Batch System at OSC

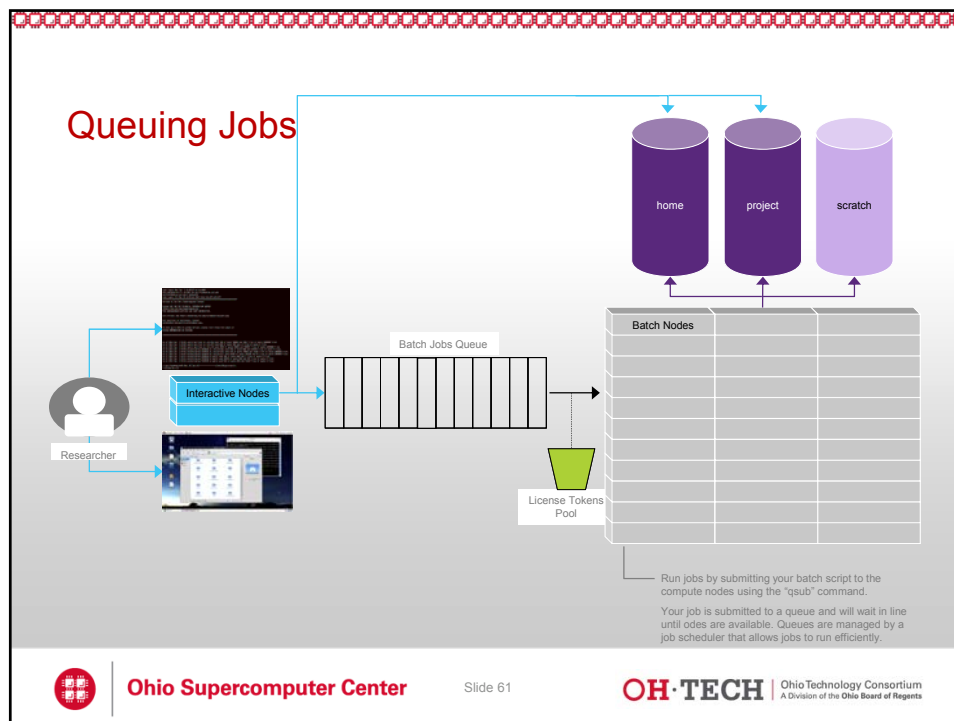

- Compute nodes are allocated through the batch system
 - PBS – Portable Batch System
 - Torque – resource manager
 - Moab – scheduler
- Documentation at www.osc.edu/supercomputing/batch-processing-at-osc

Ohio Supercomputer Center

Slide 60

Ohio Technology Consortium
A Division of the Ohio Board of Regents

Idea Behind Batch Processing

- Whatever you would normally type at the command prompt goes into your batch script
- Output that would normally go to the screen goes into a log file (or files)
- The system runs your job when resources become available
- Very efficient in terms of resource utilization

Ohio Supercomputer Center Slide 62 **OH·TECH** Ohio Technology Consortium
A Division of the Ohio Board of Regents

Running a Job on the Compute Nodes

- Create a batch script for a job
- Submit the job
- Job gets queued
- Job runs when resources become available
- Get your results when the job finishes

Ohio Supercomputer Center

Slide 63

Ohio Technology Consortium
A Division of the Ohio Board of Regents

Sample Batch Script

```
#PBS -N serial_fluent
#PBS -l walltime=1:00:00
#PBS -l nodes=1:ppn=1
#PBS -j oe
#PBS -l software=fluent+1
```

Job setup information
for PBS

This is a comment

```
# Set up the FLUENT environment
module load fluent
```

```
# Move to directory job was submitted from
cd $PBS_O_WORKDIR
```

Commands
to be run

```
# Run fluent
fluent 3d -g < run.input
```

Put all this into a text file!

Ohio Supercomputer Center

Slide 64

Ohio Technology Consortium
A Division of the Ohio Board of Regents

Submitting a Job and Checking Status

- Command to submit a job
 - `qsub script_file`
- Response from PBS (example)
 - `123456.oak-batch.osc.edu`
- Show status of batch jobs
 - `qstat -a jobid`
 - `qstat -u username`
 - `qstat -f jobid`

Ohio Supercomputer Center

Slide 65

Ohio Technology Consortium
A Division of the Ohio Board of Regents

Scheduling Policies and Limits

- Walltime limit
 - 168 hours for serial jobs (single node)
 - 96 hours for parallel jobs (multiple nodes)
- Per-user limits
 - 128 concurrently running jobs
 - 2040 processor cores in use
 - 1000 jobs in the batch system, running or queued
- Per-group limits
 - 192 concurrently running jobs
 - 2040 processor cores in use

Ohio Supercomputer Center

Slide 66

Ohio Technology Consortium
A Division of the Ohio Board of Regents

Waiting for Your Job To Run

- Queue wait time depends on many factors
 - System load
 - Resources requested
 - nodes, cores, large memory, gpus, software licenses
 - Fair share limits (if load is high)
 - reduced priority for users or groups using a lot of resources
- To see **estimated** start time for job
 - `showstart jobid`
 - Very unreliable

Ohio Supercomputer Center

Slide 67

Ohio Technology Consortium
A Division of the Ohio Board of Regents

Waiting for Your Job To Run

- Queue wait time depends on many factors
 - System load
 - Resources requested
 - nodes, cores, large memory, gpus, software licenses
 - Fair share limits (if load is high)
 - reduced priority for users or groups using a lot of resources

Ohio Supercomputer Center

Slide 68

Ohio Technology Consortium
A Division of the Ohio Board of Regents

Job Output

- Screen output ends up in file `job_name.ojobid`
 - Copied to your working directory when job ends
 - Example: `testjob.o1234567`
- To see screen output while job is running
 - `qpeek jobid`
 - Example: `qpeek 1234567`

Ohio Supercomputer Center

Slide 69

OH·TECH | Ohio Technology Consortium
A Division of the Ohio Board of Regents

Interactive Batch Jobs

- Interactive, but handled through batch system
 - Resource limits same as standard batch limits
- Useful for tasks forbidden on login nodes
 - Debug parallel programs
 - Run a GUI program that's too large for login node
- May not be practical when system load is high
 - Long wait, same as standard batch job
- To submit an interactive batch job (example)
 - `qsub -I -X -l nodes=2:ppn=12 -l walltime=1:00:00`

Ohio Supercomputer Center

Slide 70

OH·TECH | Ohio Technology Consortium
A Division of the Ohio Board of Regents

Batch Queues

- Oakley, Ruby, and Glenn have separate batch systems
 - Submit job and check status on the same cluster
- Debug reservation
 - A few nodes on each system are reserved for short jobs (≤ 1 hour)
 - Special flag required on Ruby: `-q debug`

Ohio Supercomputer Center

Slide 71

OH·TECH | Ohio Technology Consortium
A Division of the Ohio Board of Regents

Glenn or Oakley – Which should I choose?

- Some software installed only on one system
 - See software page for your application
- Oakley is newer and faster, with more memory
- Glenn often has shorter queue waits
- Can switch between them
 - Most sequential code will run on either system
 - Performance may be better on system code was built on
 - Keep separate executables in different subdirectories

Ohio Supercomputer Center

Slide 72

OH·TECH | Ohio Technology Consortium
A Division of the Ohio Board of Regents

Parallel Computing

- Each processor is fast, but real speed comes from using multiple processors
- Multithreading
 - Use multiple cores on a single node
 - Shared memory
- Message passing (MPI)
 - Use one or multiple nodes
 - Distributed memory

Ohio Supercomputer Center

Slide 73

OH·TECH | Ohio Technology Consortium
A Division of the Ohio Board of Regents

To Take Advantage of Parallel Computing

- Program must be written to take advantage of multiple cores and/or multiple nodes
- Many commercial applications have multithreaded or parallel versions
- Must use `mpirexec` for multiple nodes
- **Can't just request more nodes or cores and expect your job to run faster**

Ohio Supercomputer Center

Slide 74

OH·TECH | Ohio Technology Consortium
A Division of the Ohio Board of Regents

Specifying Resources in a Job Script

- Nodes and cores (processors) per node
- Memory
- GPUs
 - See “Batch Processing at OSC” on OSC website
- Walltime
 - Overestimate slightly – job will be deleted if it hits limit
 - Shorter job may start sooner due to backfill
- Software licenses
 - See specific software page on OSC website

Ohio Supercomputer Center

Slide 75

Ohio Technology Consortium
A Division of the Ohio Board of Regents

Ohio Supercomputer Center

An OH-TECH Consortium Member

Storage

www.osc.edu

Ohio Technology Consortium
A Division of the Ohio Board of Regents

Home Directories

- Each user has a home directory
- Visible from all OSC systems
- Backed up daily – “permanent storage”
- Quotas
 - 500GB of storage per user account
 - 1,000,000 files maximum
 - Cannot create new files if over quota
 - Quota and usage info displayed at login

Ohio Supercomputer Center

Slide 77

OH·TECH | Ohio Technology Consortium
A Division of the Ohio Board of Regents

Project Directories

- PI may request project directory if more space needed
 - Send request to OSC Help
 - Large requests are reviewed by SUG Allocations Committee
 - Shared by all users in the project
- Backed up daily
- Visible from all OSC systems
- Project quota is separate from the home directory quota

Ohio Supercomputer Center

Slide 78

OH·TECH | Ohio Technology Consortium
A Division of the Ohio Board of Regents

Sample Quota Display

Quota display at login (information collected nightly):

```
As of 2010 Jul 15 04:02 userid usr1234 on /nfs/06 used 28GB of
quota 500GB and 41374 files of quota 1000000 files
As of 2010 Jul 16 04:02 project/group PRJ0321 on /nfs/proj01
used 27GB of quota 500GB and 573105 files of quota 1000000
files
```

Output from `quota` command (run manually):

```
Disk quotas for user usr1234 (uid 11059):
Filesystem
  blocks   quota   limit  grace  files   quota   limit  grace
fs06-oak.ten.osc.edu:/nfs/06/osc
201698292 450000000 524288000          631137 950000 1000000
```

File Management

- Compress large, rarely used files
 - Use `gzip` or `bzip2` commands
- Combine large numbers of small files into an archive
 - Use `tar` command

Ohio Supercomputer Center

Slide 80

Ohio Technology Consortium
A Division of the Ohio Board of Regents

Parallel File System – Lustre

- Designed to handle heavy parallel I/O load
- Faster access than home and project directories
- NOT good for small files
- Visible from all cluster nodes (shared)
- Suitable for short-term storage (up to 6 months) of large amounts of data
- Also useful as batch-managed temporary storage
- **Scratch storage – NOT backed up!**

Ohio Supercomputer Center

Slide 81

Ohio Technology Consortium
A Division of the Ohio Board of Regents

Local Disk – \$TMPDIR

- Local file system on each compute node
 - 812 GB on each Oakley node
 - 1000 GB on each Ruby node
 - 393 GB on each Glenn node
- Fast – use for intermediate or scratch files
- Not shared between nodes
- Not backed up
- Managed by the batch system
- Data removed when job exits

Ohio Supercomputer Center

Slide 82

Ohio Technology Consortium
A Division of the Ohio Board of Regents

Overloading the File Servers

- “A supercomputer is a device for turning compute-bound problems into I/O-bound problems.” --Ken Batcher (parallel computing pioneer)
- One user’s heavy I/O load can affect responsiveness for all users on that file system
- **Never** do heavy I/O in your home or project directory!
- Use \$TMPDIR, copying files in and out as necessary
- Don’t let large numbers of jobs run in lockstep.

OSC doesn't have the software you need?

- Commercial software
 - Fill out a request form (see our FAQ)
 - SUG will consider it
- Open-source software
 - You can install it yourself in your home directory
 - If there's enough demand, we can install it for shared use
- Have your own license?
 - Contact OSC Help

Supercomputing

As a leader in high performance computing and networking, the Ohio Supercomputer Center (OSC) is a vital resource for Ohio's scientists and engineers. OSC is a fully-scalable center with mid-range machines to match those found at National Science Foundation centers and other national labs. The Center's flagship supercomputing system is the Oakley Cluster, an 8,300+ core HP Intel Xeon machine.

OSC also is home to the Ohio Interface Laboratory, which provides state-of-the-art graphics equipment and output services for computer graphics and animation. Members of the Science and Technology Support Group provide much of the information for this server.

Getting Started

Welcome to OSC! If you are new to supercomputing, new to OSC, or simply interested in getting an account (if you don't already have one), we have some resources to help you.

- Read about the [basics of High Performance Computing](#) (highly recommended for new users).
- Learn more about our [account allocation process](#), and how to get started.
- Apply for [expanded resources](#) beyond those for a start-up project.
- Get help [connecting to our resources](#).
- Read our [policies](#), [FAQ](#), code of ethics for users, and glossary.
